

June 2024

Dear Parents,

Coming into third grade the students should have total mastery of their math facts with addition and subtraction through 20. Please have them do **Reflex twice a week** throughout the summer. If you do not have access to Reflex, please use flash cards or have your child count by 2's – 12's as often as they can.

Worksheets and timed tests are a great way to reinforce the facts and can be found at: <https://math-drills.com/>

The students should be reading books across the genres. They should read at least one-chapter book over the summer, and at least once a week, read aloud to a family member. This could be a book read to a younger sibling or a page out of a chapter book to a parent.

Lastly, the public library has a wonderful reading program with incentives that might be fun to do: <https://www.mrspl.org/books-more/summer-reading>

Have a fun summer!

Sincerely,

The Third Grade Team
